

**PARADISE VALLEY  
POSTOFFICE IS BURNED**

The Kemler store building, with its contents, and the postoffice, located in the same building at Paradise Valley were totally destroyed by fire

Saturday evening. The loss is estimated at \$30,000, with no insurance. All the incoming and outgoing mail and fixtures of the postoffice were destroyed.

**USE AIRPLANES  
IN EXPLORING**

(Correspondence of Associated Press)  
PARA, Brazil, Nov. 4.—Airplanes may be employed to map the valley of the great Amazon river. If they are successful in their effort to use aircraft for surveying the routes of the rivers of French Guiana, it is understood the Brazilian Government will apply the same method to the survey of the Amazon and its affluents. A French company is said to have been formed in Cayenne with hangars on the Maroni river and French aviators with flying experience gained in the war are being employed to run the twenty-five aeroplanes said to have been furnished by the government.

In addition to making maps, the machines will be employed for carrying valuable freight, mails and passengers. There are immense rivers in French Guiana which, because of the presence of many rapids are now only navigable in canoes which take weeks to transport freight over distances which the hydroplanes can cover in as many hours, with always large stretches of smooth water offering a suitable surface for landings and "take-offs". The freight charges are said to be high, and the traffic is expected to consist mainly of gold, balata and essence of rosewood, which are the principal exports of the colony. The passenger business is not expected to be heavy.

Kentucky's commissioner of forestry is having a hundred bushels of maple and oak tree seeds collected in his state for shipment to Belgium, to be planted in the war devastated areas of that country.

**FIVE BILLIONS  
NEXT YEAR TO  
RUN COUNTRY**

(By Associated Press)  
WASHINGTON, Dec. 3.—No appreciable reduction in taxes for the next fiscal year is to be thought of, Secretary Glass declared in his annual report sent today to congress. Government receipts must be kept at their present figure, he said, in order to bring government borrowing to an end.

Facing expenditures estimated at \$5,629,486,359 for the year ending June 30, 1920, and \$4,738,996,358 for the year ending June 30, 1921, the government must enforce rigid economy, Mr. Glass declared. He placed the deficit for the current year at \$2,905,000,000 and for the year ending June 30, 1921, at approximately \$2,005,000,000.

On this basis, Mr. Glass urged congress to deny "every appropriation for expenditure in new fields." He said the same policy should obtain until the government has its sinking fund well under way and repayment of the war debt "satisfactorily begun."

Returning to the estimated government expenditures for the fiscal year ending June 30, 1921, Mr. Glass said the military establishment would ask appropriations aggregating \$989,578,000. Of this sum, \$897,392,000 would be required, he said, for maintenance of the army proper while \$92,186,000 would be apportioned to the national guard. The Military Academy would receive \$6,778,637.

For the navy, the appropriation of \$542,031,904, including \$185,248,000 for a building program is to be asked.

The legislative establishment will need \$9,025,397, it was estimated, while the executive branches of the government combined will seek a total of \$149,111,463. Chief among the latter departmental expenditures is an estimate of \$73,496,101 for the treasury department. This sum, which is much larger than in former years indicates the added expense borne in the enforcement of prohibition. Included in this also is the appropriation of \$37,528,102 to be asked by the department of agriculture for carrying on its field activities.

Permanent annual appropriations for the year amount to \$1,435,407,752. These included \$1,017,500,000 for interest on the public debt; customs and internal revenue, \$25,307,000; sinking fund \$297,500,000; and miscellaneous \$95,000,000.

**PRECIOUS STAMP**

(Correspondence of Associated Press)  
PARIS, Nov. 18.—A postage stamp was sold at auction yesterday for 28,200 francs. It was issued by the Rumania-Moldavia government in 1858 and experts say it is probably the only one of its kind in existence.

**NOTICE OF HEARING OF SETTLEMENT OF ESTATE OF FRANK LAMBERT, DECEASED.**

In the District Court of the Fifth Judicial District of the State of Nevada, in and for the County of Elko, in the Matter of the Estate of Frank Lambert, Deceased.  
Notice is hereby given that Henry H. Gibson, Administrator of the Estate of Frank Lambert, Deceased, has rendered and presented for settlement and filed in the above entitled court his first and final account of his administration, and has also filed in said court his petition for distribution of said estate; and that Tuesday, the 23rd day of December, 1919, at 10 o'clock P. M. of that day in the courtroom of the above entitled court at the courthouse in the Town of Tonopah, County of Elko, State of Nevada, has been fixed by said court, for the settlement of the First and Final Account of the Administrator of the Estate of Frank Lambert, Deceased, and the hearing of the petition for distribution of said estate, at which time and place any persons interested in said estate may appear and file his exceptions to said first and final account and the petition for distribution and show cause why same should not be granted.  
Dated: November 17, 1919.

**FINEST CLIMATE  
FOUND AT PARA**

(Correspondence Associated Press)  
PARA, BRAZIL, Nov. 4.—Although only eighty miles from the equator the city of Para enjoys a perennial climate of what might be called mild summer. There is a shower of rain nearly every afternoon throughout the year, which, together with the welcome trade winds blowing in from the Atlantic temper the intense heat of the sun and gives Para a climate that for evenness and equability cannot probably be surpassed.

The mornings and evenings are always cool, and the mid-day heat never approaches that of a "regular" August day in New York or Chicago. Sunstroke is entirely unknown. There is no record of a case in the entire Amazon valley. Schoolboys' play football in the open city spaces during the hottest hours of early afternoon and laborers naked to the waist toil sweating on the docks in the blazing sunshine without any apparent ill effects.

Straw hats are worn the year round in Para, and a sun helmet would be regarded with almost as much curiosity on the Avenida da Republica here as it would on Fifth

avenue.  
The clothes worn by men are also a matter of surprise, to the foreigner visiting this equatorial city. Brazilian professional men, doctors, lawyers and engineers, invariably wear clothes such as are worn in New York in the spring or fall. Government officials, senators and deputies favor the conventional "cut-away" and in official calls on the state governor, for instance, this very un-tropical garb is the rule.

Business men, and especially foreigners, however, adhere to the cool-looking white cotton, linen or duck in the matter of evening clothes the citizens of Para are very formal in the days of the rubber boom when public entertainments were the rule—and not, as now, the exception—the conventional full evening dress was always worn by men.

Traveling by night, the hassar, a sort of catfish, will go several days over land from a diminishing pond to another, or from river to river.

Chili claims that the Island of Chilo off its west coast is the original home of the potato and that it has been cultivated there since early in the fifteenth century.

The great nostrum of ancient times was what the Romans called mithradatum, which had from forty-seven to fifty different vegetable ingredients.

The value of the world's cotton lands is valued at \$6,000,000,000.

**THE DARMS COAL MINING COMPANY**  
A Nevada Corporation (Fully Paid and Non-Assessable)  
**A COMING NEVADA INDUSTRY**  
The Darms Coal Company owns 160 acres of patented land and 800 acres of land adjoining—subject to patent, near Coaldale, Esmeralda County, Nevada. This land is classified by the United States Land Office as "Coal Land." The first prospecting on the ground was done by sinking an incline shaft on a vein which showed a large outcrop of low-grade coal. At a depth of 200 feet, the coal gave 28 per cent ash, by Government test, and at 280 feet the vein was 21 feet thick and six feet of it gave 15 per cent ash proved to be commercial coal. By crosscutting 40 feet, another vein was cut that showed three feet of good coal.  
It was not feasible to mine this coal through the prospect shaft, and in consideration of the improvement in the quality as depths were attained, engineers recommended a new shaft, which has been sunk to a depth of 540 feet. A contract has been let to Faller & Mulock to sink an additional 80 feet, which, according to surveys, would bring the shaft about 30 feet below the big vein.  
The contractors are working on the contract now, which calls for its completion within 60 days. The Company is equipped with hoist, compressor, pumps and all accessories needed for mining. This Company has a property which bids fair to be able to supply Southern Nevada with fuel in the near future. A limited amount of Treasury Stock is offered for sale at
